STEALTHboost-Loft-200 Tank and Booster Pump Set

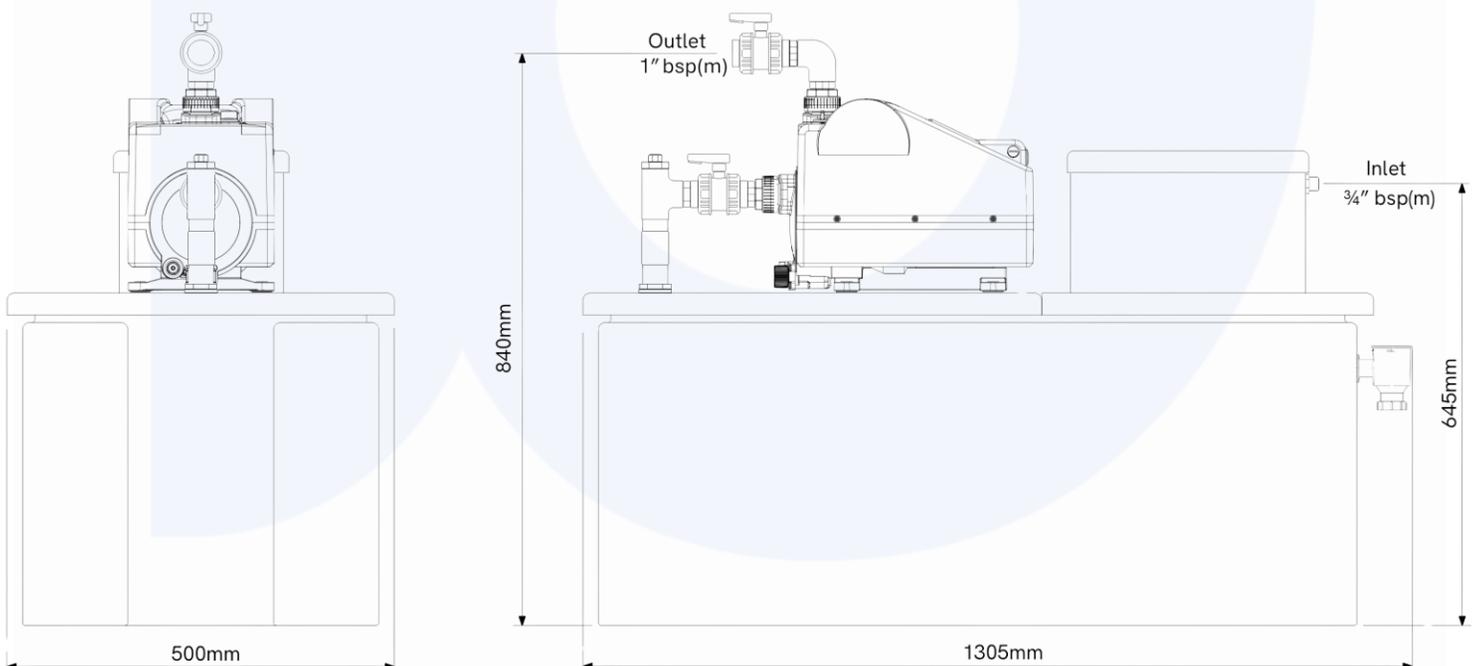

The STEALTHboost-Loft-200 LS is the ideal solution where space is at a premium. Measuring just 500mm wide and 520mm high with the lid removed, the cold water storage tank which holds 160 litres, has been designed to fit through a standard loft hatch and with the built-in pipework union connections, the unit can be easily disassembled and reassembled in just minutes.

Specifically designed to solve the problem of poor mains water pressure in the home, the STEALTHboost-Loft-200 has an Industry leading specification:

- ✓ WRAS approved 200 litre nominal capacity GRP insulated storage tank.
- ✓ Quiet operation $\frac{3}{4}$ " high flow re-fill float valve.
- ✓ Full size two-piece lid giving easy access for maintenance and cleaning.
- ✓ Quiet running energy efficient variable speed pump.
- ✓ Delivers constant pressure at varying flows.
- ✓ Additional slave tank available which doubles storage capacity.
- ✓ Assembled and tested in the U.K. with a 2-year guarantee

Net weight: 34 kg

STEALTHboost-Utility-300 Tank and Booster Pump Set

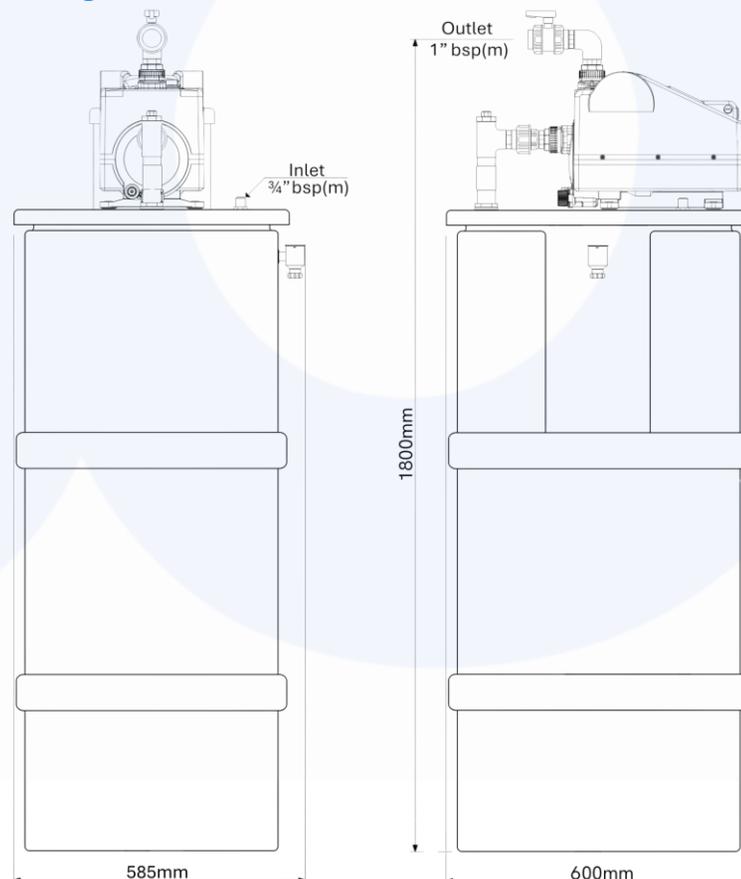

The STEALTHboost-Utility-300 is a compact and reliable water boosting system designed for domestic properties where space is at a premium. The design incorporates a GRP insulated WRAS approved cold water storage tank holding 260 litres of water with a compact footprint of less than 600mm x 600mm, perfect for a utility area, cylinder cupboard or area with limited space.

Specifically designed to solve the problem of poor mains water pressure in the home, the STEALTHboost-Utility-300 has an Industry leading specification:

- ✓ WRAS approved 300 litre nominal capacity GRP insulated storage tank.
- ✓ Quiet operation $\frac{3}{4}$ " high flow re-fill float valve.
- ✓ Compact footprint for fitting into existing limited spaces.
- ✓ Quiet running energy efficient variable speed pump.
- ✓ Delivers constant pressure at varying flows.
- ✓ Additional slave tank available which doubles storage capacity.
- ✓ Assembled and tested in the U.K. with a 2-year guarantee

Net weight: 39 kg

STEALTHboost-Utility-580 Tank and Booster Pump Set

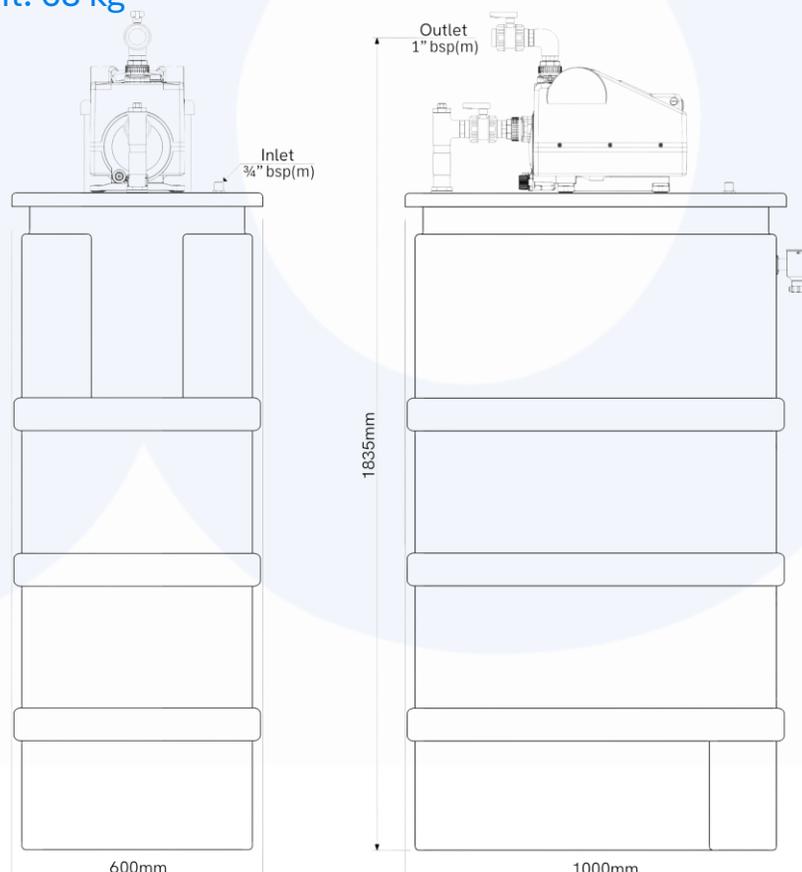

The STEALTHboost-Utility-580 is designed for larger properties with up to 5 bathrooms. Its compact size is ideal where space is at a premium with the design incorporating a GRP insulated WRAS approved cold water storage tank holding 500 litres of stored water. The slimline design allows for the unit to fit through standard doorways.

Specifically designed to solve the problem of poor mains water pressure in the home, the STEALTHboost-Utility-580 has an Industry leading specification:

- ✓ WRAS approved 580 litre nominal capacity GRP insulated storage tank.
- ✓ Quiet operation $\frac{3}{4}$ " high flow re-fill float valve.
- ✓ Increased storage capacity to meet the demands of larger properties
- ✓ Quiet running energy efficient variable speed pump.
- ✓ Delivers constant pressure at varying flows.
- ✓ Additional slave tank available which doubles storage capacity.
- ✓ Twin pump option available for higher duty demands.
- ✓ Assembled and tested in the U.K. with a 2-year guarantee

Net weight: 68 kg

STEALTHboost Variable Speed Pump

- Maximum Flow rate: 95 litres / min
- Maximum Pressure: 6.0 bar
- Noise Level: < 43 Dba
- Motor Power: 0,8 kW
- Maximum Current: 4.6 Amps
- Protection class: IP65
- Water Temperature: 5 to 45 °C
- Ambient Temperature: 5 to 50°C

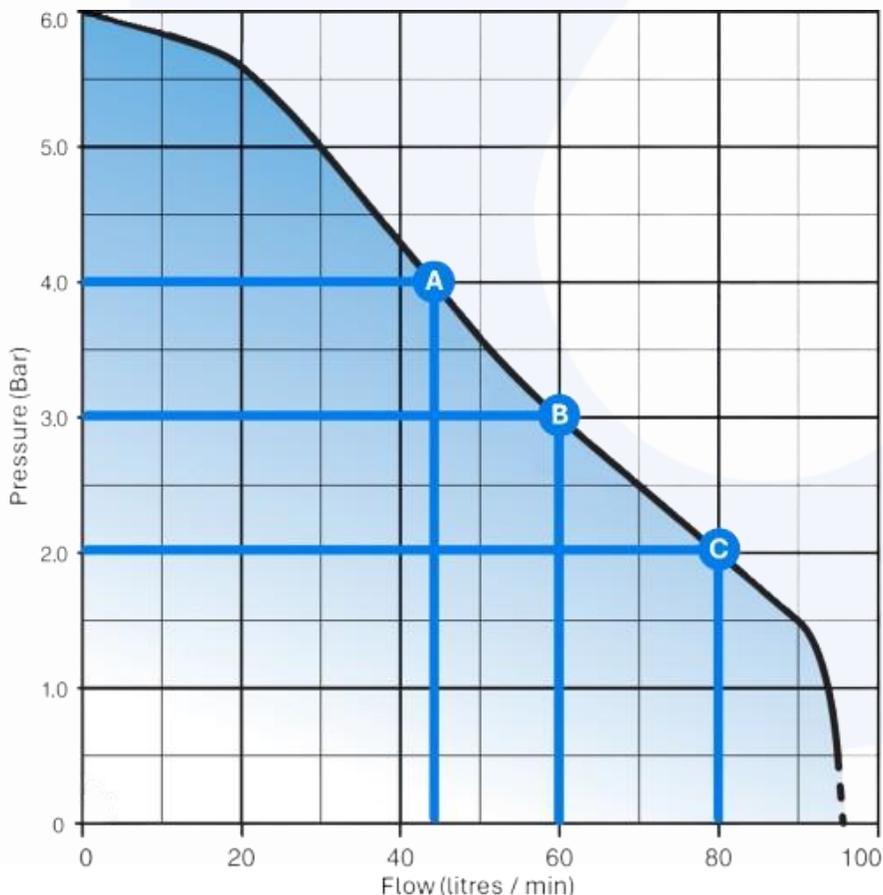

Control Remotely

With the built-in Bluetooth® connection, you can control your system remotely and conveniently via the Hydrostation app. Download it from the App store or Google Play.

Pump Performance Curve

A High Pressure

Operating at 4.0 bar, the pump can deliver up to 44 litres per minute.

B Medium Pressure

Operating at 3.0 bar, the pump can deliver up to 60 litres per minute.

C Low Pressure

Operating at 2.0 bar, the pump can deliver up to 80 litres per minute.
